

A Manufacturer and Distributor
of Liquid Handling Solutions

MURRAY EQUIPMENT, INC

For over 60 years, Murray Equipment, Inc. (MEI) has been the industry leader in the design, manufacture, and distribution of liquid handling solutions. We specialize in engineering and manufacturing innovative solutions for the petroleum, fertilizer, chemical, DEF and industrial markets. We're privately-held and operated, which means we build our business on relationships, not profits. Partner with MEI and discover why we continue to lead the industry in providing liquid handling equipment.

Murray Equipment is the Industry Trusted Partner

Becoming the market leader didn't happen overnight. Over the years, we have built a reputation of being the supplier of choice in each of our markets. How did we do this? Simply put, we put our customers first. When they speak, we listen. From the moment there is a need, to beyond the day it is delivered, we are focused on providing the highest quality products and the best services at a fair price.

DOING BUSINESS IS EASY WITH MEI

Conducting business with Murray Equipment is easy. There's simply no better way to put it. We are dedicated to providing the right solution, on time, every time. We stand behind our products. If it isn't right, let us know. We'll make it right. MEI employs a solid team of individuals with a strong knowledge base behind our equipment packages and specialty systems. From the design to the support, MEI is poised to deliver the solutions you need.

MEI INVESTS IN INNOVATION

At Murray Equipment we believe in supporting our customers, not only today, but well into the future. That's why we have significant investments in R&D, facilities, and quality control. MEI employs a full team of mechanical and electronic engineers with years of hands-on experience. With over 95,000 ft² of facilities and a state-of-the-art machining center, it's no wonder customers continually engage MEI to fulfill their liquid handling needs.

MEI DELIVERS QUALITY

Each liquid has its own unique properties. At Murray Equipment we make it our business to understand each liquid and how to improve the handling and measuring of it to protect your margins. In addition, we ensure each piece of equipment that leaves our building adheres to strict quality standards. We do so by employing quality managers tasked with proactively identifying and resolving quality issues. We have a large resume of global weights and measures approvals in addition to many of our products being UL/CSA listed. That's why customers who rely on quality equipment trust MEI.

MEI PROVIDES UNIQUE SOLUTIONS FOR LIQUID MANUFACTURERS

Murray Equipment specializes in solving the complex liquid handling requirements of its customers. What began in the agribusiness and petroleum industry quickly expanded as we saw unmet needs across the globe. Today, Murray Equipment solutions can be found supporting companies both large and small on nearly every continent.

FACILITY PRODUCTION AND AUTOMATION SYSTEMS

Murray Equipment is the industry leader of custom fertilizer and chemical mix plant design and construction in the USA. We offer not only system design, but facility and plant control design as well. MEI products span several automation levels ranging from single product presets to completely automated systems. In addition, MEI can provide full integration with industry leading agronomy 3rd party software solutions. All our solutions are designed to help you improve order accuracy, maximize deliveries, and decrease loading time.

Murray Equipment also specializes in plant automation systems for industrial liquid applications. We have a large knowledge base and configurable system components that allow us to provide unique solutions for complex scenarios. Let us take your business to the next level of automation.

SPECIALTY PARTS & REPAIR SERVICES

Murray Equipment offers the parts and in-house repair services to support our products and systems. We regularly repair and provide replacement parts for pumps, meters, controls, tanks, control valves and other liquid handling accessories. This allows us to extend the life of our customer's products while improving ROI. Refer to our catalog for a partial list of equipment and parts we offer.

MEI has In-House Expertise

Did you know that Murray Equipment has a full in-house engineering team? Our MEI engineering team alone has over 100 years of industry experience, supported by a group of inside sales reps with over 85 years combined experience. It's no wonder we're known as the specialized liquid handling experts.

MEI IS AN EXPERT IN LIQUID MEASUREMENT & STORAGE

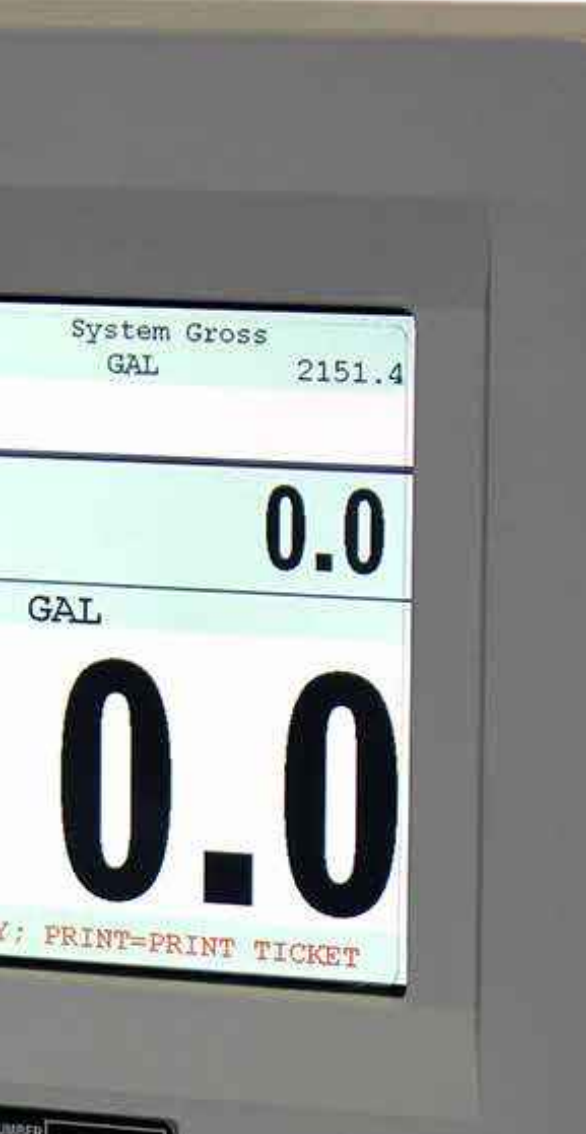

Murray Equipment is constantly striving to improve the safety, accuracy, and user control of liquid storage and measurement. We combine the latest mechanical and electronic innovations to provide superior solutions for our customers to save them time and money.

LIQUID MEASUREMENT (TOTAL CONTROL SYSTEMS)

Murray Equipment is a worldwide leading provider of positive displacement piston and rotary flow meter solutions and electronic registration through the Total Control Systems (TCS) brand name. We offer a large range of Weights and Measures approved positive displacement rotary flow meters for a variety of applications. Additionally, we are the industry's only supplier of the piston flow meter known for its high level of accuracy across variable flow rates. Our attention to detail and focus on quality makes us the provider of choice in a market space traditionally dominated by a few suppliers.

Our deep understanding of a wide range of liquids allows us to design superior metering solutions for the refined fuels, aviation, DEF, LPG, marine, renewable fuels, and agricultural industries. Every meter part, material, and design is meticulously analyzed to deliver the highest accuracy and product lifetime in the industry. The TCS division is an ISO 9001 certified manufacturer.

Constant Innovation

Murray Equipment is never content to stand still. We believe in supporting our customers both now and well into the future. As needs change thanks to technology improvements and governmental regulation changes, we are there listening to the market to see if we can help improve the way our customers do business.

DIESEL EXHAUST FLUID SOLUTIONS (KLEERBLUE SOLUTIONS)

MEI is on the cutting-edge of developing Diesel Exhaust Fluid (DEF) storage and dispensing solutions in North America through its KleeBlue Solutions brand name. We offer a full line of innovative solutions for retail truck stops, commercial fleets, private fleets, construction and agricultural equipment. Even before the emergence of DEF in the US market, we made it our business to understand DEF's stringent purity and temperature requirements as well as the logistical concerns of the industry. The result is a full range of solutions including manufacturing systems, island-friendly storage and dispensing systems, bulk storage systems, portable bulk delivery skid systems, and basic drum/tote dispensing solutions. MEI's quick response to providing solutions to this emerging industry has made us an early leader in DEF handling solutions.

Handle liquids in your operations? Contact us today to discover how Murray Equipment's solutions can meet your liquid handling needs.
